

# NORTH CAROLINA Solar Center

Advancing Clean Energy for a Sustainable Economy

North Carolina State University, College of Engineering, Raleigh, NC 27695 | 1 800 33 NCSUN | [www.ncsc.ncsu.edu](http://www.ncsc.ncsu.edu)

## Overview N.C. Solar Center

The North Carolina Solar Center helps our state's firms achieve the growth necessary to meet our nation's need for clean, inexpensive, abundant energy that can ensure our future energy security. The Solar Center provides a gateway to the N.C. Department of Commerce and the university system resources. Through its many facilities and programs, the Solar Center plays an indispensable role in attracting, training and sustaining the state's innovative energy firms and workforce.

### The Solar Center offers technical and business assistance focused on:

Industrial Efficiency  
Renewable Energy  
Clean Transportation  
High Performance Building

The NCSU Solar House on N.C. State's Campus serves as a demonstration of renewable energy and energy efficiency

The Solar Center provides training programs and equipment to North Carolina's industry professionals and renewable energy firms.

### The N.C. Solar Center also offers technical and educational services in the following areas:

- Economic Development
- Energy Policy (DSIRE)
- North Carolina Policy
- Professional development & training
- Energy assessments
- Solar Testing
- Workshops and Special Events
- NC Green Professionals Database
- Economic Calculators
- Design Assistance
